

Experiment	3
Aim	Create an E-Commerce app using Bottom Navigation
Objective	<ul style="list-style-type: none">• To Create E-Commerce App• To Develop Bottom Navigation• To Use 60-30-10 rule
Name	Abhijit Khambekar
UCID	2024510027
Class	FYMCA
Batch	D
Date of Submission	16/02/2025

Technology used	Flutter
Task	Develop an e-commerce app with Bottom Navigation Bar with 4 tabs: Home, Browse list of Products (Atleast 5 products) and see product details (image, name, price, and description), Profile and Cart.
Code with proper label	homescreen.dart: import 'package:flutter/material.dart'; import '../widgets/common_header.dart'; import 'package:google_fonts/google_fonts.dart'; class HomeScreen extends StatelessWidget { @override Widget build(BuildContext context) { return Scaffold(appBar: CommonHeader(),

```
body: Center(  
  child: Column(  
    mainAxisAlignment: MainAxisAlignment.center,  
    children: [  
      // AK Store!! (Logo-like Text)  
      Text(  
        'AK Store!!',  
        style: GoogleFonts.pacifico(  
          fontSize: 50,  
          fontWeight: FontWeight.bold,  
          color: Colors.blue[800],  
        ),  
      ),  
      SizedBox(height: 10),  
      // Tagline  
      Text(  
        'Where one can buy anything!!',  
        style: GoogleFonts.lobster(  
          fontSize: 20,  
          fontStyle: FontStyle.italic,  
          color: Colors.blue[600],  
        ),  
      ),  
    ],  
  ),  
);  
}
```

cart.dart:

```
import 'package:flutter/material.dart';
import '../widgets/common_header.dart';
import 'products.dart';

class Cart extends StatefulWidget {
  static List<Map<String, dynamic>> cartItems = [];

  @override
  _CartState createState() => _CartState();
}

class _CartState extends State<Cart> {
  @override
  Widget build(BuildContext context) {
    return Scaffold(
      appBar: CommonHeader(),
      body: Cart.cartItems.isEmpty
        ? Center(child: Text('No Items Added'))
        : Column(
            children: [
              Expanded(
                child: ListView.builder(
                  itemCount: Cart.cartItems.length,
                  itemBuilder: (context, index) {
                    return Card(
```

	<pre>color: Colors.blue[300], margin: EdgeInsets.all(10), child: Padding(padding: EdgeInsets.all(10), child: Row(children: [Image.asset(Cart.cartItems[index]['image'], width: 80, height: 80, fit: BoxFit.cover,), SizedBox(width: 20), Expanded(child: Column(crossAxisAlignment: CrossAxisAlignment.start, children: [Text(Cart.cartItems[index]['name'], style: TextStyle(fontSize: 18, fontWeight: FontWeight.bold),), Text(Cart.cartItems[index]['description']), Text(Cart.cartItems[index]['price'], style: TextStyle(fontSize: 16, color: Colors.red[800]),), SizedBox(height: 10), ElevatedButton(</pre>
--	--

	<pre>onPressed: () { setState(() { Products().createState().products.add(Cart.cartItems[ind ex]); Cart.cartItems.removeAt(index); }); }, style: ElevatedButton.styleFrom(backgroundColor: Colors.red,) child: Text('Remove from Cart'),)],))],))],))]; ElevatedButton(onPressed: () { setState(() { Cart.cartItems.clear(); ScaffoldMessenger.of(context).showSnackBar(SnackBar(content: Text('Order Placed!'))); }); }, style: ElevatedButton.styleFrom(backgroundColor: Colors.red,) child: Text('Remove from Cart'),)],))];</pre>
--	--

```
        ));  
    },  
    child: Text('Place Order'),  
  ),  
],  
),  
);  
}  
}
```

products.dart:

```
import 'package:flutter/material.dart';  
import '../widgets/common_header.dart';  
import 'cart.dart';  
  
class Products extends StatefulWidget {  
  @override  
  _ProductsState createState() => _ProductsState();  
}  
  
class _ProductsState extends State<Products> {  
  List<Map<String, dynamic>> products = [  
    {  
      'name': 'Camera',  
      'description': 'Capture Every Moment.',  
      'price': '$100',  
      'image': 'assets/images/p2.jpg',  
    },  
  ],  
}
```

```
{
  'name': 'Nivia',
  'description': 'Only for Men',
  'price': '$50',
  'image': 'assets/images/p1.jpg',
},
{
  'name': 'Watch',
  'description': 'It Tells Time!!',
  'price': '$80',
  'image': 'assets/images/p3.jpg',
},
{

Question and Answers	<p>Answer the following Questions:</p> <p>1. How to create Bottom Navigation?</p> <p>Solu: To create a Bottom Navigation in Flutter, we use the BottomNavigationBar widget. It allows us to add multiple tabs at the bottom of the screen, making navigation between pages easy. Each tab has an icon and a label. We keep track of</p>

	<p>the selected tab using a variable and update the screen using the setState() method when a user taps on a tab.</p> <p>2. How did you use 60-30-10 rule in your application?</p> <p>Solu: The 60-30-10 rule is a color scheme technique where 60% is the main color, 30% is the secondary color, and 10% is the accent color. In the application, Blue is used as the main color (60%) for the background and headers, a lighter shade of Blue (30%) is used for cards and containers, and accent colors like Green for the "Add Cart" button and Red for the "Remove Cart" button (10%) make important actions stand out. This creates a balanced and visually appealing look.</p> <p>3. Which new elements did you use for creating UI components?</p> <p>Solu: New UI elements used include Card for displaying product information in a neatly organized manner, CircleAvatar for showing the profile image in a circular shape, and SnackBar for displaying short messages like "Profile Saved" or "Order Placed". Additionally, the AlertDialog was used for confirmation pop-ups, and the GoogleFonts package was added to use stylish fonts, making the text look more attractive and professional.</p>
Conclusion	Learned, how to create navigation bar on bottom, linking of 2 pages and displaying data transfer among pages, how to use google fonts.
